When money is borrowed by issuing bonds, the Town must repay not only the principal amount of the bonds but also interest on the bonds. The amount of interest to be paid will vary depending upon the rate of interest and the years to maturity at the time of issue. The validity of the bonds and of the voters’ ratification of the bonds may not be affected by any errors on the estimates made of the costs involved, including varying interest rates, the estimated cost of interest on the bond amount to be issued and the total cost of principal and interest to be paid at maturity. If the actual amount of the total debt service for the bond issues varies from the estimate, the ratification by the electors is nevertheless conclusive and the validity of the bond issue is not affected by reason of the variance.
